DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-15, and 20-29, drawn to a method of providing uplink diversity in a satellite communications system, classified in class 455, subclass 505.
 - II. Claims 16-19, and 30-31, drawn to antenna and signal commutating apparatus for use in a satellite classified in class 343, subclass 786.
2. The inventions are distinct, each from the other because of the following reasons:
Invention I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the invention I has separate utility such as a satellite communication system providing uplink diversity which does not require an antenna apparatus, as recited in Group II.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, their divergent subject matter and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 2821

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement has been traversed (37 CFR. 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Art Unit: 2821
